

Force Outlook .PST Path

Open your registry and find the appropriate key below.

- **Outlook 2003** - [HKEY_CURRENT_USER\Software\Microsoft\Office\11.0\Outlook]
- **Outlook XP** - [HKEY_CURRENT_USER\Software\Microsoft\Office\10.0\Outlook]
- **Outlook 2000** - [HKEY_CURRENT_USER\Software\Microsoft\Office\9.0\Outlook]

Create a new REG_EXPAND_SZ (Expandable String) value called 'ForcePSTPath' and set it to equal the full path of the required personal folder directory (e.g. "C:\Mailbox").

Restart Outlook for the change to take effect.

***Note:** This is a expandable string value so you can use environment variables, such as %userprofile%, to specify the path. When the value does not exist the default value of "%userprofile%\Local Settings\Application Data\Microsoft\Outlook" is used.*
